

Savannah Sydney – A multi-million-dollar investment in the future!

New Head Office, Customer Engagement Kitchen and Application Demonstration Room for Savannah Bio Systems Australia

Dear customer, supplier, partner,

It is with great excitement that I announce that Savannah Bio Systems Australia has acquired a new Head Office location in the heart of North Shore Sydney.

This long-term investment in the future is to build on our capabilities and to ensure we continue to provide excellence in customer support and service in the specialty ingredients industry.

The new facility, comprising of 3 floors, has been completely rebuilt internally to accommodate our new Head Office, Customer Engagement Kitchen and Application Demonstration Room.

With a 'from scratch' design process we have been able to maximise use of the floor space to ensure Savannah is equipped to tackle the next decade of customer challenges and continue to provide world class solutions.

The ground floor will accommodate a complete built-for-purpose Customer Engagement Kitchen (CEK) and Application Demonstration Room. The CEK will allow us to further formulate, design and test new concepts in the areas of industrial baking, dairy and ice-cream, beverages, confectionary, meat and meat analogue products, health and nutrition and soups, sauces and fine foods.

The middle and top floor will have newly built office space to suit our ever-expanding Sydney team.

This is another a very exciting step in Savannah's future, and I would like to thank you for your continued support. We look forward to growing together.

Our new address is:

Savannah Bio Systems Pty Ltd
Head Office
Unit 3, 6-8 Herbert Street
St Leonards, NSW 2065
Australia

We will relocate permanently on the 9th of October 2019.

Thanks and regards,

Scott Trethowen

Commercial Manager
Savannah Bio Systems Pty Ltd
