

COVID-19 Update for Customers and Distributors #1, March 13, 2020

Due to the evolving situation with the Covid-19 virus, UNIPEKTIN Ingredients AG have taken internal measures and implemented specific rules with immediate effect which must be adhered to minimize the impact as much as possible.

All our employees have been informed and are instructed accordingly.

We are constantly following and implementing the government's recommendations.

Due to the exceptional nature of the situation

- No external visitors are allowed in our buildings without permittance for the next few weeks and until further notice.
- Many more disinfectant dispensers have been installed throughout the company.
- We follow the evolution of the crisis very closely.

To date, we can reassure you that we keep working as usual and are in contact with our suppliers regularly.

We do not face major operational problems except for minor shipping delays due to container shortage, but this is normalizing already.

We do however expect minor shipping delays to selected European countries depending on how the situation with the Coronavirus further evolves.

We will post updates as soon as new information becomes available to us, in the News section of our Website and we encourage you to check in regularly using the following link: <https://unipektin.ch>
